

## Everest Highest Marathon Trek

## Trip Overview

Standing at the foot of Mount Everest, the earth's highest peak, your heart will start thumping with a spirit of adventure and excitement for a race unlike any other—the Everest Marathon, the world's highest.

This is more than just a race, it is a battle of your own body against you and nature as it gasps for oxygen. Moving through the Khumbu valley, tracing the path once used by the historical trek of Edmund Hillary and Tenzing Norgay, you will run towards Everest.

Not just the destination, the journey in itself is a voyage while you push your limits and conquer your inner Everest. You will be running with people around the globe where not only speed and personal bests matter but also your perception and self-consciousness.

Completing this marathon will not only give you a lifetime sense of accomplishment, but it will also transform your physical and mental strength. It is a connection to nature.

The Everest Highest Marathon Trek is a grueling 42.195 kilometers that takes place at Everest Base Camp. It requires proper training, acclimatization, and a healthy amount of respect for the mountains themselves. If you are up for this challenge, Everest awaits you. Ready to redefine running on air?
